

Peltor™ High Attenuation Flex Lead Headset

The 3M™ Peltor™ Flex Headset range offers unique acoustic performance providing outstanding communication in very high noise environments. A standard chassis jack for connecting Flex cords completes the headset.

- High-attenuating shells with optimised acoustic design and excellent space for the ears for the best possible sound quality and comfort.
- Electret speech boom microphone with effective noise compensation for clear and reliable communication
- Quick positioning boom microphone for easy handling
- Soft, wide, foam and fluid-filled ear cushions.
- Individually sprung stainless steel head band provides an even and consistent distribution of pressure around the ears
- Beam-mounted earphones that provide minimal resonance and distortion, offering excellent sound reproduction even in high-noise environments
- PTT button on the cup
- Numerous configurations. Overhead, neckband and helmet-attached versions to meet most users' requirements.
