

FLOATING MARINE VHF PORTABLE TRANSCEIVER

New portable VHF marine transceiver, completely floating, in case of accidental falling into water, it can be easily recovered and yellow colour makes Navy-011 clearly spotted in the sea.

With its vibration function it is possible to drain seeped water away from the speaker.

Easy to use, Polmar Navy-011 is the ideal portable VHF radio for professional use or leisure purposes.

- Floating and completely waterproof JIS-7
- Vibration function to eliminate water from the speaker
- Channel 16
- PLL Controlled Circuitry
- Adjustable squelch
- Keylock
- Selectable High/low power
- Battery level indicator
- Back-lighted LCD Display
- Memory channels
- Dual/Scan key
- Signal strength meter for RX / TX
- Power Saving Circuitry
- Li-ion Battery Pack
- SMA antenna connector

Supplied with:

1000mAh Li-ion battery pack (with DC jack for charging only current tool), 12V cigarette lighter, adapter for charge, wrist strap, belt clip, rubber antenna and user manual.

Caratteristiche tecniche	
Channels	All international channels
TX Frequency range	156.025 ~ 157.425MHz
RX Frequency range	156.025 ~ 160.025 MHz
Power supply	7.4Vcc/1000mAh battery pack
RF Power	6W high - 1W low
Modulation	FM
Audio distortion	5%
Sensitivity	0,3µV a 12 SINAD
Squelch sensitivity	Soglia - 12 dBµV (EMF)
Audio output	250mW a 5% THD
Operating temperature	-15°C to +55°C
Antenna impedance	50 Ohm
Dimension (h x w x d)	157 x 65 x 40 mm
